

Motion presented to Faculty Senate 5/06/14
Proposal for use of AP, CLEP and IB/HIB for Gen Ed effective Fall 2014
Changes to current policy are in red

The UUCC reviewed the policies for use of AP, CLEP and IB/HIB to satisfy general education requirements because uniform policies are needed for the new Degree Works system. No changes are proposed to the policies for use of AP credit which were established originally by the Faculty Senate when Gen Ed was implemented. The committee reviewed the use of CLEP exams, which are exams for credit without any course experience, in relation to the learning outcomes for the gen ed categories and concluded that acceptance of CLEP exams was appropriate for the Math requirement if the student takes the Calculus exam and to satisfy the state's US History requirement. IB/HIB exam acceptance is similar to the existing AP policies.
